

How do we deepen our Resilience?

By virtue of the fact you're reading this tells me you have resiliency. A key question is how do we deepen, and widen our capacity to thrive?

✘ **Falsehoods and Lies** – These can wear us down and hurt us, as like the half truths they are not all accurate.

- Indicating that we're what? Very Tall? Short?
- Never mind the 79 – 197 hours your practiced,

Michael H Ballard is a SME – Subject Matter Expert on Resiliency. He consults and trains with individuals and groups, organizations and communities on how to develop and deepen their resiliency.

Let's start at the beginning.

A key component of being resilient is our ability to understand, manage and nurture our self-definition. What is self-definition you ask? Good question.

Self Definition is a compilation of how we've knowingly and unknowingly defined ourselves based on many variables. These include our race, colour, creed, gender, physical traits, IQ, EQ, how we where parented, our health extended family, neighbourhood, workplace, educational levels attained, the media, community and country to name just a few.

Where should we start?

Let us start with you considering this concept about Self Definition.

If there was a picture of you in the dictionary; not just any dictionary but one that is confidential and only you can see. Your dictionary only! Now, let us take a trip inside this

confidential dictionary to see what you'll discover and uncover.

First realize that there are three key types of items and memories stored here.

The first are the **truths about us**. However some of the things we think are the truth in time are not always 100% accurate.

Half Truths – Half Falsehoods

~ These are beliefs about us that can confuse and misdirect us as we lack clarity because of them. I.e. You're just like your (Place name here) and will never do well in math. When in fact perhaps you're not going to be a Engineer, or a Physicist, yet could do very well as a business professional using business math.

What to do about these three categories?

Well, several years back I mentored a young gentleman who'd lived on the street for ten years. After several deep and meaty conversations he shared the phrase "Fearless moral inventory". Great phrase. I'd suggest a slightly gentler approach. Consider something along the lines of a "Deep and wide honest inventory of how have I defined myself to date? Then, what should be adjusted? Added? Thrown out?

It is a process so it will not just happen over night. However if we have the courage to understand that we took years to get this way than real change can often happen in hours, days and weeks. If we keep practicing. The road to mastery is one built on excellence not perfection.

So 

,
h_oNo where to be seen between Positive and Negative thoughts,
w half truths are the neutral way of thinking that is also
donegative.

Generally people have them there as positive, negative and half-truths.

Words

I.e.

– Stupid – Oh don't be so stupid!

– Amazing – It is amazing how you do that so well.

Phrases

I.e. – You're just like your ...
Under weight? Over weight? Smart? Stupid?
Incredibly good looking?

– You're so lucky
the lessons you took and the mentor you had. You lucky? Not a
chance. Luck favours the prepared. You prepared. You gained
some mastery!

Pictures I.e. Images burnt into our brain of a very upbeat or
very negative time.

Use caution of reviewing our failures and mistakes. Over time
we run the risk of programming ourselves for more failures and
mistakes.

Mini movies and sound tracks

I.e. They play over and over and over again if we give them
permission. They become burnt into our brain of a very upbeat
or very negative time. They can influence our mood, our
relationships our happiness and our success.

Replaced the negative ones with new ones. Write a new script!
Act it out in the privacy of your bedroom or Living room.

We need to stay vigilant against a society that works on a
negative asset basis. We're consistently feed messages that if
we just "wore the right clothes, drove a certain car, lived in
a certain area, attended a certain school, we'd be smarter,
more successful and more likeable. All not true of course. Yet
the cosmetics, fashion industry and many others do quite well
with that pitch. Not that a new piece of clothing is not a
good thing. Just not a replacement of the homework we all
should be doing.

Well with over 80% of what we think and are told framed in the
negative it is no wonder we have "issues" around resiliency.
Feeling comfortable in our own skin and managing our Self
Definition is a very powerful first step. Foundational work
some of us would say.

So nothing like the present to start to walk the talk about
resiliency.

What area of your Self Definition will you work on today? The
time is now to take this on and start to build and rid of what
blocks you as you house clean.

How to give CPR to a baby and toddler

Blake Lively and Ryan Reynolds have recently highlighted the importance of taking baby and toddler CPR lessons on their respective Instagram accounts by revealing that they had both recently taken a course, and urging fellow parents to get involved.

Blake, 29, wrote alongside a picture with showed her with several training dummies: “ALL MAMAS AND DADDIES OUT THERE– I can’t recommend this enough, I took a CPR class with with a focus on babies and toddlers. Google “infant CPR class near me” and you’ll see lots of listings. For those of you who haven’t done it, you will love it. It’s so helpful by giving you knowledge, tools, and some peace of mind.”

The couple, who are parents to two daughters, know the importance of first aid – Ryan, 40, revealed in his post that he had helped save his nephew’s life thanks to a past CPR lesson, but was taking a refresher course focused on infant and toddler CPR, to further enhance his knowledge and skills.

With research showing that 74% of parents say the first aid emergency they fear the most is finding their baby unresponsive, St John Ambulance has issued first aid advice on what to do if a baby or child is unresponsive and not breathing.

How to do Baby CPR (under the age of one)

If your baby is not responding to you and they are not breathing, follow these steps to perform CPR:

1. Call 999/112 for emergency help: If you are on your own, give 1 minute of CPR before calling on a speaker phone.
2. Give 5 initial puffs over the mouth and nose.
3. Give 30 chest pumps using two fingers at a rate of 100-120 pumps per minute.
4. Repeat: give 2 puffs followed by 30 pumps. (30:2)
